Preface

THE picture language was the earliest form of written expression. It is still under some conditions the most effective. The cartoonist often hits the bull's eye harder and makes the bell ring louder than the writer of the most vigorous and forcible English,

Among cartoonists, none excell "Bart," whose clever and intelligent pencil is doing the most effective work in that line to be found in any American newspaper. When, a few weeks ago, a publishing house in Chicago issued a large book containing five hundred and fifty of the best cartoons of the war from twelve foreign and twenty-nine American Journals,—the leading English, American, French, German, Spanish and Mexican papers—it was found that the publishers had selected twice as many of "Bart's" cartoons as of any other cartoonist.

The picture history of the war has been written in the Journal more fully than in any other paper, no opportunity being lost to present the important war events of the day from the cartoon standpoint. These cartoons are reproduced here, and it is believed they will be found a valuable and interesting part of the story of an eventful year.

MERELY A FRIENDLY CALL.

January 26, 1898.

January 26, 1898, found the battle-ship Maine on a friendly mission to Havana. This was the beginning of the end. Spain never considered this "a friendly call." On February 15th, the Maine was destroyed by the explosion of a sub-marine mine. Whatever historians may decide was the cause of the war, the destruction of the Maine certainly was the crisis that precipitated it. This

cartoonists trained their guns on the offender later. The islands of Cuba and Hawaii solicited the attention of the President and the people of the United States, bound together. The question of the annexation of Hawaii was before congress, together with the recognition of Cuba, before the Maine crisis brought us face to face with war. After war was begun, Hawaii became a military necessity and so a part of the United States. The needs of the two peoples started us expanding.

politician. A few days sufficed to satisfy the people of this country that Spain, or some of her officials, was guilty of the Maine horror. Indignation knew no bounds. Retaliation was demanded. The necessary delay for official investigation irritated the people and made this cartoon (Feb'y 19) the most popular of the week. Subsequent events have vindicated President McKinley's

ABOUT MOVING TIME.

Spain—Wouldn't Wonder If It May Be Necessary for Me to Go Before "Moving Day." This Place Is Very Unhealthy.—April 13.

It was indeed moving time for Spain in Cuba. On April 11, the President announced to congress that his best endeavors for a peaceful solution of the trouble had failed, and asked that body to empower him to use the army and navy of the United States to stop the war, and to continue generous

I do not speak now of that other item which certain newspapers and others are trying to make the leading issue of the democratic campaign. Forgetting the glory, the achievement, the success with which an army of 200,000 men was raised out of nothing and a hostile nation almost wiped out in ninety days, they are hovering like buzzards over the battlefields and hospitals and graveyards, looking only for the misery and suffering and death which are inevitable in war. Preface.

DURING the past year no subject has been so much upon the public mind and so frequently discussed, none has developed so wide a divergence of opinion, as the question of expansion The merits of the proposition have been set forth exhaustively in various forms—in public debate, in books, in magazines, in pamphlets, in newspapers, in social converse, and in nearly every way in which men convey ideas to each other.

And so, of course, the cartoonist has had much to say in his often effective and interesting way about expansion And none of the cartoonists has handled the question more ably or more forcibly than the one who makes the daily cartoon for The Minneapolis Journal. It is one of the charms of "Bart's" picture-making that he is always up-to-date. He is as prompt to seize men ally and portray with his effective and facile pencil the real merits of the proposition as the editorial writer or the newspaper reader who promptly makes his own comment upon the news of the day. This book, entitled "Expansion," is a collection of "Bart's" best work during the past year, and, as the title indicates, contains a series of pictures of particular aspects of the expansion quest on as they presented themselves from day to day, throughout the year. Along with these expansion cartoons are a few upon other topics.

The frequent and generous reproduction of "Bart's" cartoons in the best publications of the day—the Review of Reviews, Literary Digest, Public Opinion and many of the best dailies—testifies to the fact than he is not only appreciated at home, but abroad, where he is not personally known.
